Mustang SUD to hold election May 6

Three Board of Director's seats set for ballot

AUBREY, TEXAS – The Mustang Special Utility District (SUD) will hold an election on May 6, with three Board of Director's positions set to be on the ballot.

Seats currently occupied by Marc Hodak, Kim Lehere and James Burnham will be on the ballot.

Both Burnham and Hodak were elected to the Board of Director's of Mustang SUD on May 10, 2014. Lehere was appointed to the board on Oct. 27, 2014.

Registered voters who reside in the District can cast their ballot on Election Day from 7 a.m. – 7 p.m., or during early voting from 8 a.m. – 5 p.m. from April 24 to April 28, May 1 and May 2.

The polling location for early voting and Election Day is at the Mustang SUD office – 7985 FM 2931 Aubrey, Texas.

If you are not registered to vote or need to update your address, you must do so by April 6 with the Denton County Elections Administration.

Requests for ballot by mail may be submitted to the Mustang SUD office in person, by mail, or emailed (swalker@mustangwater.com) no later than 5 p.m. on April 25. Ballots by mail must be received no later than 7 p.m. on Election Day.

If interested in applying for a place on the ballot, applications must be submitted to the Mustang SUD office no sooner than Jan. 18 and no later than 5 p.m. on Feb. 17.

About the Mustang Special Utility District

The Mustang Special Utility District (SUD), based in Aubrey, Texas, has been committed to providing a safe, quality water supply and wastewater services to northeast Denton County for over 50 years. Initially established in 1966 as the Mustang Water Supply Corporation to serve a mostly rural area with just 50 connections, it later converted to an SUD as it evolved and grew with the region, thus becoming a Texas political subdivision. Today, the District serves more than 12,500 connections and roughly 30,000 customers in the surrounding communities and is recognized by the Texas Commission on Environmental Quality as a Superior Public Water System. The District's current system consists of 10 groundwater wells, 2.8 million gallons per day of surface water capacity and capacity in three wastewater plants.
